

MANNATECH PURGE #2

WHY IS A PURGE IMPORTANT?

Protecting our Associates and Customers' personal information is of upmost importance for us. A Purge allows your records to be more streamlined, less cluttered and easier to work with.

A Purge can provide Associates with some structural benefits. For example, if an Associate wants to re-engage and re-enroll a long-term inactive Associate, once they are purged, the upline Leader can re-enroll them and place them where it makes the most sense to their business.

In order to streamline the business, we are moving toward an annual purge to keep our members current.

DETAILS:

DALLAS (CDT) Time: Saturday 25th May 2019 14:00PM – 12:00 midnight	SYDNEY (AEST) time: Sunday 26th May, 2019 05:00AM – 15:00PM
---	--

Removal of all inactive and terminated Associate and Preferred Customer positions globally.

"Inactive Associate" positions are those that have not purchased any product order on their personal or by any of their customers as of 1st July, 2017. (0 PPV)

"Inactive Preferred Customer" positions are those that have not purchased any product order as of 1st July, 2017. (0 PPV)

The purge could result in the increase of number of legs which could lead to more leader development without any additional Downline Point Volume (DPV) or Commissionable Volume (CV) contribution.

All positions that were sponsored by the purged positions will be moved under the next active position in the line of sponsorship. This could potentially increase the number of legs for the active Associates (reverse leg consolidation).

PREPARE YOUR TEAMS

WATCH

Watch for communications and connect with the training webinars and instruction sheets which will be available shortly. Preserve your current data now!

THINK

Examine your own organisational structure and how it could be impacted by the Purge.

INFORM

Ensure your team members are informed and prepared. Check when the training will be held and get onto it.

Upcoming Training Sessions will be provided on:

- How to use the Genealogy report in Success Tracker, importing to excel, sort and see who will be purged.
- Training webinars and printed instructions will be available in preparation for the Purge.
- The trainings will be available "live" and will also be posted in the Library.
