MANNATECH

The Difference

A healthy blend of vitamins and minerals is important for children. However, the foods being given to those in underdeveloped countries is typically not meeting the minimum nutritional criteria.

That's why Mannatech created PhytoBlend™ powder to provide the best variety of nutrients through a trusted and reliable source.

- It contains over 20 vitamins and minerals to help promote and maintain good health and vitality.
- Served in a powder form, it can easily be added to a variety of foods such as soups, rice and porridge, making it ideal for large feeding programs.

How You Can Make a Difference

Buy our revolutionary products.

That's it. It's that simple.

The Truth

- According to the World Health Organization and UNICEF, roughly 100 million children under five years of age are underweight¹ and 150 million in developing countries are malnourished.²
- Undernutrition can hinder brain development, reduce intellectual capacity and stunt growth.¹

The Difference

- Our product helps to combat this crisis.
- Whenever anyone buys or sells a product, it triggers a donation.

The Movement

In order to help battle a lack of proper nutrition, we developed a nutrient-rich product that bolsters the nutritious value of food. It's packed full of vitamins and minerals that children need to help protect against nutritional deficiencies.

Every time a Mannatech product is purchased, a donation is made. By making a difference in your life, you make a difference in theirs.

FOR EVERY \$100 ORDER OF MANNATECH PRODUCTS, A ONE-MONTH SUPPLY OF PHYTOBLEND POWDER IS PROVIDED FOR A CHILD IN NEED.

Purchase products today and give children helpful nutrients they need!

Our Goal

To see 5 million children in need receive proper nutrition through our products.

Our Mission

To fight global malnutrition by helping nourish the world with our real-food supplement, PhytoBlend powder.
