†Manapol® aloe vera

Ambrotose Complex enhances general health and wellbeing.

Ambrotose contains powerful glycans that contribute to the many benefits of the product. One of the unique ingredients is the Manapol® aloe vera extract. Manapol aloe vera gel extract is rich in acemannan, a component of aloe vera gel known for its various health properties, including immune system support. This purer form of aloe vera gel has a higher molecular weight than others, and is also richer in a glycan called Mannose. Adding Manapol aloe vera gel extract to Ambrotose Complex has enhanced the glycan content, creating a more beneficial product. Ambrotose Complex has two New Zealand patents.
