

U.S. Product Taxability

Mannatech's sales tax rate program charges sales tax based on the "ship to" zip code, except for Success Tracker for which sales tax rates are based on the billing address. Please be aware of what your rate is before you call to place an order; we cannot quote rates over the telephone. Local sales tax rates may be obtained through your state's Department of Revenue.

The following list is based on state-by-state sales tax regulations regarding which of our products are taxable and which of our products are exempt for each state. Please remember, all states do not view our products the same.
